

# MICROBLADING

## AFTERCARE

- Apply healing balm according to your artists advice. If you have excessively oily skin, you may not need to use healing balm at all. For those with dry skin, the balm can be used up to x3 daily.
- Avoid the following during the healing process:
  - Getting brows wet
  - Saunas, steam rooms, & sun beds
  - Excess sun exposure
  - Use of daily skincare products directly on brows
  - Makeup on brows
  - Touching, rubbing, picking, or scratching your brows
- You may find that your eyebrows scab or become slightly dry. DO NOT SCRATCH them, just tap them to release the itch.
- If eyebrows get wet during the healing process pat them dry with a towel, DO NOT RUB.
- Use wet q-tip with antibacterial soap to gently remove previous layer of balm or to cleanse the eyebrows, only if needed.

## HEALING STAGES

Pigment will appear darker & bolder, which can last up to a week after treatment.

Do not be alarmed if you see pigment on cotton swabs, or if brows flake/scab.

Complete healing process takes ~6-8 weeks, at which time the true color of the results is evident. During this process, the pigment will soften and lighten.

Be patient, even if you think too much color has been lost, as your skin is still regenerating & naturally exfoliating.

After 6 weeks, we can schedule your touch up if necessary!
